

## Frequently Asked Questions

Monique believes fear comes from the unknown. We make it our priority to leave you with as much knowledge as possible to be educated during and after the process. We will prepare you for hair loss and thinning, along with how to care for your skin/scalp.

You will leave with an abundance of knowledge and reassurance.

When will I know it's time to shave my head?

Every case is different – as is every client. Usually a sure sign is slight tenderness to the scalp is a sign it will be heavily shedding.

Why do you recommend a synthetic hair wig over a human hair wig?

Our line of synthetic wigs look authentic. They are low maintenance – won't fade – won't shed – no need to fuss – will always look good and air dry beautifully! Why spend time and energy drying a natural wig when we believe you should be resting.

When will my hair (and brows) grow back or will it?

Hair grows back a ½" each month starting one month after chemotherapy ends. At that point, during your first year of new growth, we will walk you through this final stage of your journey to learn ways to deal with a short pixie or perhaps a curly one ... at no charge.

## Client Testimonials

*"Thank you for all your support. My wife enjoyed going to your salon because she felt respected for who she was and not pitied for the disease she had. After her appointments she felt recharged from your warmth and care you provided."*

*"When I enter your salon I feel enveloped by kindness and caring. You have created a place where women feel honored and renewed. I know my daughter felt so respected by your approach."*

*"Thank you so much for helping me through a very difficult day. I was instantly relieved by your kindness."*

## *Your Journey is our Journey*

We create a loving and nurturing atmosphere with a level of privacy and comfort.

We immediately become a part of your journey – with an open door policy to help you along the way. We complete this journey with complimentary cleanups, as your hair begins to grow back... and it will!

We assure you that you will leave our “safe place” with dignity and confidence.

Our clients are not just limited to those experiencing hair loss due to chemotherapy.

Our clientele includes those living with Alopecia, Lupus, Thyroid Disease, and other permanent or temporary conditions. We also have cyber wigs available in child sizes.

In addition, we are not only licensed stylists and wig consultants but are also trained in applying medical hair extensions to help give your hair length and fullness as your hair is growing in.

This is a very special entity to our salon. We are so privileged and blessed to meet such brave, amazing women.

## *Our Synthetic Wig Gallery*

Our synthetic hair wigs have all the positive characteristics of human hair: moisture retention to maintain a healthy feel and touch as well as cuticle formation to simulate beautiful light reflective qualities thus creating a very natural look. Synthetic hair wigs have style memory allowing the wigs to maintain your style over and over. They are lighter weight than human hair wigs for your comfort and colorfast so your natural color is always true. And no worrying about the elements like sun, wind, rain, or humidity!

### *Features*

Super lightweight cap construction for the ultimate in comfort and secure wearability, as well as being breathable and adjustable for size.

Hand tied with light, refined materials that conform to the head for an individual customized fit.

Subtle colors, hues and highlights that mimics natural hair creating dimension. Also available in textured hair.

## *How to Book Your Appointment*

The initial consultation is approximately 90 minutes to go over all aspects of the process as well as answer all the questions you may have.

Consultation and follow up visits are always no charge.

We are a full service Aveda Salon and Spa. We carry organically certified skin care and hair care products as well as makeup for all your needs.
